

AD LEGENDS OVERVIEW

Big-agency creative. Title-agency budget.

Ad Legends is an AI creative platform guided by legendary advertising creatives. Build your agency's brand once, then make the ads, social posts, co-marketing and video it needs, in minutes. Original work built around your agency, never a template another agency in your market is already using.

WHAT TITLE AGENTS MAKE WITH IT

Realtor and lender co-marketing

Flyers, social posts and email pieces for the agents and loan officers who send you business.

Billboards, print and direct mail

Big, simple ideas for the highway, the closing table and the mailbox, with print-ready files.

Strategy and briefs

A clear plan for who you are talking to and what to say, before a single ad gets made.

Social posts and ads

Facebook, Instagram and LinkedIn posts and ad sets, sized for each channel, in your voice.

Video spots

Short video for social and your website, from script to finished cut.

A consistent brand

Brand Memory learns your logo, colors and voice from your website, so every piece looks like you.
